

# FLEET MANAGEMENT INFORMATION SYSTEM (FMIS)

CDI Government Services has developed and maintains a fleet management information system for our government customers. Our time-tested solution offers various asset management activities including acceptance recording, warranty failure management and analysis, configuration control, maintenance recording and tracking, equipment logging, and history tracking. Our customized, web-based systems can meet highly specific customer requirements with low startup costs and budget-tailored maintenance and support.

## Fleet Management to Meet Your Needs
